

I have for sale an S14b23 (US) driveline with approx 70,000 miles on it, ~10,000 miles of which I have put on it myself before I stored the car.

Before Guten Installed it in my touring, it received:

All Intake Gaskets
Z3 SSK with full bushing/shift arm bearing replacement.
Alternator Bushing Replacement
Spark Plugs

Oil changed every 3k with Valvoline VR1 10w30 for the winter, 20w50 for the summer. Cooling system is practically new. I did a full cooling system overhaul in February 2014, with about 1200 in parts alone (labor was about 45 hours between myself and my business partner). Also replaced the selector rod/output shaft seal and the 32mm lock plate at that time. Car has been stored indoors since May 2014, as the ECU died and needed a rebuild. I have since had the ECU rebuilt, changed the IGN coil, flywheel sensors, and spark plugs.

I'm selling it because I don't get to enjoy the engine; it makes its power at its rev limit (6500rpm) and I rarely even touch 5500rpm. It would shine in a car that got tracked regularly. I love the sound, the response and fun the ITB's provide, but I need something a touch more practical and powerful for daily use.

Aside from the entire E30 M3 cooling system, you'll also get
Trans
Harness
Ecu rebuilt by Programma INC.
OEM Headers & cat

The engine is still in my touring, so I welcome you to come see it run, and feel it perform. It's a healthy engine! I'm in no rush to sell.

Asking \$8000 USD. Lowball offers will be ignored.

Maintenance 2/28/14
